Our Experience is Your Advantage

We have served utilities and industrial customers for more than four decades, gaining invaluable experience with virtually all OEMs. Our field service technicians apply that knowledge and hands-on experience to insure your project's success. Our technicians are also backed by a fully staffed engineering department.

Jordan Transformer

FIELD SERVICE TRANSFORMERS AND MOBILE SUBSTATIONS

Reduce Costs

Our factory trained service technicians have more than 75 years of combined experience repairing and outfitting transformers in the field. This alternative to buying new or shipping your transformer off-site for repair is both economical and timely, with your repaired transformer up and running sooner.

Safety

- Daily Job Safety Assessments (JSA's)
- Orientation & Training
- Personal Protective Equipment (PPE), OSHA 30, MSHA, Lock out – Tag out, Rigging, Manlift, Forklift, etc.
- Secondary Oil Containment
- DOT Compliant
- Substance Abuse Program
- Safety Incentives

Meet Project Schedules

Our work with power plants, mines and industrial facilities across the country has earned us a reputation as transformer assembly experts. We develop precise directives and contingency plans, providing our customers confidence in executing time-critical outage management schedules, keeping your projects on track and on time.

Turnkey Services

- On-site Preparation and Disassembly
- Loading & Transportation
- Untanking & Inspection
- Remanufacture & Testing
- Delivery & Placement on Pad
- Assembly of Unit

Maximize Uptime

Your aging or low-performing transformers can be reconditioned on-site by our field service professionals. This cost-effective solution minimizes downtime and the potential for unexpected outages. We are also one of a few factory-backed field service companies that supports GSU and Arc Furnace Transformers. With a vast parts inventory and relationships with top parts manufacturers across the country, we will quickly have your transformer back in service.

Jordan Transformer field services allow you to:

- **Minimize downtime**
- **Reduce costs**
- **Meet project schedules**
